DETAILED ACTION

This action is responsive to applicants' preliminary amendment filed November 24, 2003. Claims 1-9 have been cancelled. Claims 10-17 are pending in this application.

Information Disclosure Statement

The Information Disclosure Statement filed November 24, 2003 includes International Search Reports, without filing dates. Therefore, they are made of record but not considered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 11-12 and 15-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is not clear how the cut out, alone prevent the actuator from firing. The "cut-out" must engage another portion of the instrument to prevent firing.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Claims 10 and 14-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Olson et al (US Patent 5,485,947). The patent to Olson discloses a surgical instrument having a housing (110) having an actuator (112) that moves in a distal and proximal direction, a firing safety mechanism, a firing safety mechanism (159), which include a leaf spring and a safety release (131). See column 5, line 66 – column 6, line 9.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Olson et al '947 in view of Olson et al (US Patent 5,495,952). The patent to Olson '952 suggests bending the end of the hooks. It would have been obvious to one having ordinary skill in the art to secure the leaf spring in Olson et al via a hook member secured to the housing.

Allowable Subject Matter

Claims 11-12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
